

Brief of the Organization:

The Centre for Health Policy (CHP) at the Asian Development Research Institute (ADRI) in Patna has been set up with support from the Bill & Melinda Gates Foundation to strengthen the health sector in Bihar with a multi-dimensional and multi-disciplinary approach. Its aim is to engage in rigorous analysis of the health system and inform policy makers to fine-tune interventions for even stronger outcomes.

Position: Research Consultant (Quantitative Research)

Number of position: One

Eligibility:

- PhD in Demography/Population Studies/Statistics/Economics. Those who have submitted PhD also can apply
- Demonstrable knowledge in applied econometric and demographic methods as indicated by high quality publications in peer-reviewed journals
- Well versed with advanced quantitative methods such as multilevel modelling, survival analysis, three-stage least square modelling, propensity score matching and so on by using STATA software
- Knowledge on techniques of mathematical demography, particularly, methods of population projection is essential.
- Good knowledge in Excel would be an asset.
- Excellent command over Hindi and English language and writing skill in English

Responsibilities:

- Carrying out advanced econometric analysis as per need of the study
- Provide help in writing as per need
- Secondary data collection and compilation
- Occasional field visits will be required

Remuneration:

Commensurate with knowledge, experience and quality of publications.

Interested and eligible candidates are requested to send their CV documenting their educational qualifications, research experiences and publications to Dr. Saswata Ghosh, Demography & Population Health Expert, Centre for Health Policy (CHP), Asian Development Research Institute (ADRI), Patna at saswata.chp@adriindia.org by 20th May, 2018.
